Pretend this square is 1. Shade what 10 could look like.

What if 10 had to be a **square** just like 1? Shade 10 but make it a perfect square shape.

Explain how you know you have shaded approximately 10.

What number do you think is shown here? Explain the value of each shape you see.

*I think this number is _____ because*

On the back of this paper, create your version of 238- be sure to use “overlap”.
